

How to Setup a Printer on a Macintosh Computer

This procedure will work for OS versions 10.5 and 10.6

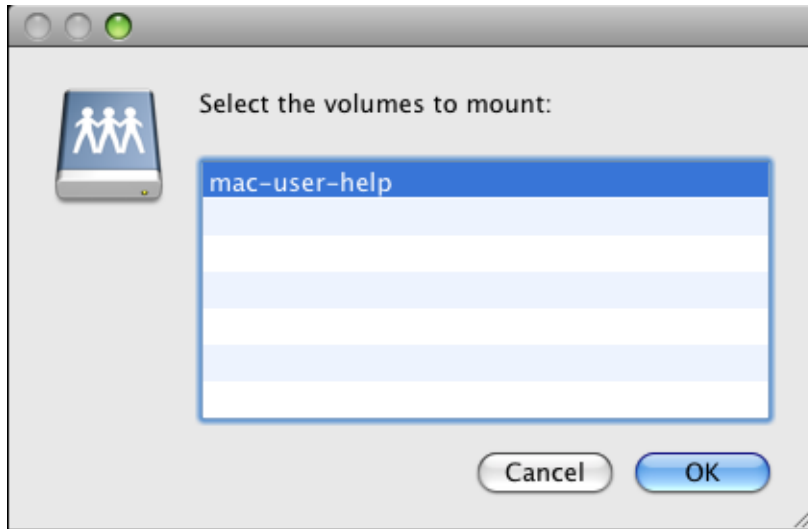

1. On the Desktop, in the Finder menu bar, select **Go>Connect to Server**.
2. In the Server Address field, enter: **smb://cotton** and select **Connect**.

3. To access the Midnight server, enter your (the end user's) username and password. Select the **Keychain** checkbox. Then select **Connect**.

4. On the next window, select **Mac-user-help** and then click **OK**.

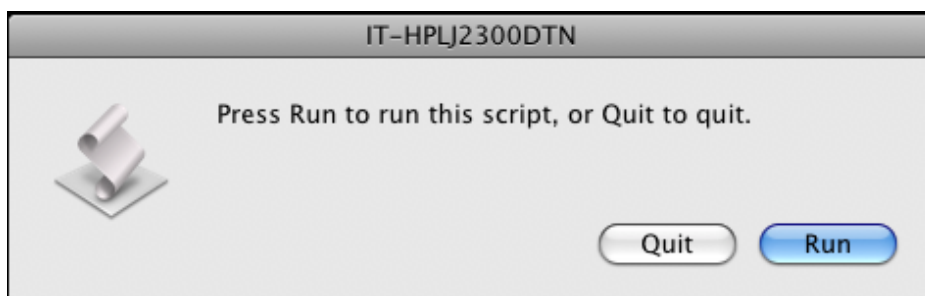

5. Single click the printer that needs to be installed then drag it and drop it on the computer's desktop. If this is not done properly, restart your computer and then start at #1 again!

Select an icon like the one below, then drag it and drop it onto the desktop:

-HPColorLJ3500N

6. Once the printer icon has been dropped onto the desktop, double click it and the select **Run**.

7. It will only take a few seconds to install the printer. After a few seconds, on the menu bar go to **Apple>System Preferences>Print and Fax**. Now you can select the default printer.
