BETHANY Corporate Event Planner

I got my first job doing flower arrangements with my aunt while I was in high school. We did them for lots of places, but I really loved doing the local galas. Watching all the glitz and glam pull together? I wanted to be more involved in THAT. So, to keep working at the company (they told me they wanted to promote me) while also going to school, I started a Business Admin degree with NCU's online program. The flexibility was EXACTLY what I need, and since graduating **I'm now running my own event company in Minneapolis.**

JONATHAN Data Logistics Specialist

Being able to learn business logistics online **was exactly what I needed.** My mom's health meant leaving home in North Dakota wasn't an option for me but my getting a Christ-centered, college level education was really important to us both. I got a lot of the technical understanding of business that I needed for my job now and a lot of encouragement from some really good people. This was a great experience for me and I recommend it to anyone.

JERMAIN Barbershop Owner

My business was doing okay but I knew I could be doing more. I didn't go to college out of high school, so after praying about it with my wife, I started looking for an affordable education opportunity. I found it with North Central's online degree. Since getting my Business Admin degree, **I've been able to put what I learned to work.** Actually, I feel like I had the advantage over my classmates, because I got to put our lessons to work right away in my store! The whole experience has been a real blessing.
