Calculate your total: _____. Should you transfer?

- » If you scored 0-4, you should strongly consider transferring to a new university. It seems like you aren't at a good fit.
- » If you scored 5-10, you may want to have a discussion with a trusted advisor at your university to decide if there are changes that you can make to stay at your current college/university, or if it's time to move on.
- » If you scored 11-15, it seems like you really love your school! There seems to be little or no reason to make a transfer to a new college/university at this time.
